DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 16 is rejected under 35 U.S.C. 102(b) as being anticipated by Kitajima et al (US 6,091,912).

Kitajima et al disclose an image forming apparatus comprising first through third doors (i.e. access doors 6a, 6b, 6c, 100b, Fig. 2, Col. 9, lines 45-65) to access disposables (i.e. toner container 1, drum apparatus 100, Fig. 2) and a fourth door 100a to access a sheet transport unit (i.e. element 11a, Fig. 6).

3. Claim 22 is rejected under 35 U.S.C. 102(b) as being anticipated by Ishii (US Pub 2002/0041775).

Ishii discloses a printer comprising first door (i.e. front door 301, Fig. 10), second door (i.e. left door 304, Fig. 10), third door (i.e. right door 303, Fig. 10), and fourth door (i.e. top scanning cover 240, Fig. 240, Fig. 7) provided to open front, left, right, and top sides of a housing of the printer.

Allowable Subject Matter

4. Claims 1-15 are allowed.

Art Unit: 2852

5. Claims 17-21, and 23-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments filed 1/10/06 with respect to claim 16 have been fully considered but they are not persuasive. The applicant argues that the Kitajima et al. reference does not teach that the front cover 100b, which refer as paper feed cassettes do not provide access to "a sheet transport unit," as recited in claim 16. The examiner disagrees and would like to point the applicant to Figure 2 and 6 of the Kitajima et al which show that an opening of a door 100b would give one access to a sheet transport unit 11a, where a recording paper is transported toward the image drum 10 so that an toner image can be formed.

7. Applicant's arguments with respect to the rejection(s) of claim 22 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

However, upon further consideration, a new ground(s) of rejection is made in view of Ishii.
